

# WebTech 5800 Locator

## WebTech 5800 Locator

The WebTech 5800 Locator is a feature-rich wireless GPS locator device at the heart of the WebTech Quadrant Vehicle Services System™ for 802.11b/g networks. Fleet managers can access the mapping and reporting capabilities of the Locators through the web-based Quadrant system.

The WT5800 Locator is ideal for applications where vehicles are operating in a 802.11 coverage area, such as an airport or campus. The WT5800 is also a cost effective tracking solution where real-time communications is not required, and vehicles return daily or weekly to a maintenance yard, or even an employee's home that is equipped with an 802.11 system.

### Benefits - Experience the WebTech Difference

- Increase mobile workforce productivity
- Lower operating costs
- Improve the safety and security of mobile assets

### Features - Get the WebTech Edge

#### Location Services on 802.11b and 802.11g networks

- GPS Tracking
- Mapping
- Reporting
- In-vehicle Navigation
- Landmarking

#### Geofencing

- Set up geofences for each vehicle, group, or whole fleet
- Receive reports regarding when vehicle entered or exited, plus stops, starts, ignition on/off

#### Telemetry Services

- Vehicle monitoring & control capabilities (while linked to 802.11b/g network)
- Door lock/unlock
- Engine Starts/Stops/Immobilization
- In-cab notification of geofence crossings

#### For 802.11g Wireless LANs

- 64-128 bit hexadecimal WEP
- Configure to "any" SSID, or specify unique SSID
- Over-the-air configuration
